Festivals of India

India is a land of festivals. We celebrate different kinds of festivals in the country.

Sankranthi is a popular harvest festival. Many people make colourful *muggu* (*rangoli*) at the entrance of their houses. Many people also fly kites on Sankranthi. It is celebrated in many parts of India.

Bathukamma is a festival that people celebrate with flowers. People make **Bathukammas** with flowers such as *tangedu*. It is mainly celebrated in Telangana and parts of Andhra Pradesh.

Bonalu is a festival in which people worship Mother Goddess and make a special dish called **bonam**. It is made using rice, milk and jaggery in an earthen pot decorated with neem leaves. It is mainly celebrated in Telangana.

Fun Activity

Make a collage on Gudi Padwa and Ugadi. Find out why, when and where these festivals are celebrated.

I am Growing Up

Learning Outcomes

In this chapter, we will:

- define what living things are.
- explain how living things grow.
- describe what hobbies are.
- name some common hobbies.

Starting Point

Paste your picture as a baby.	Paste your latest picture.

Did you look different when you were a baby? Share with your partner.

Learning Ladder

Living Things

Plants, animals and human beings are living things. All living things breathe, need food, water and grow in size.

How living things grow

Small plants grow into big plants. All baby animals grow to become big animals. We grow from a little baby to an **adult**. A small seed grows into a big plant.

Chicks come out of eggs and grow into chickens.

Eggs

Chicks

Chickens

We are born as babies. A recently born baby is called a **newborn**. Newborns cannot sit up, walk or talk.

Babies grow up to become **toddlers**. Toddlers are also small and cannot take care of themselves. Their parents look after them and teach them to walk, eat and speak.

Toddlers grow up to become young children like us. Young children can do some activities on their own.

Young children first become **teenagers** and in some years, they become **adults**. Adults can do their work **independently**.

Tick (✓) the activities that you do on your own.

1.

☐

2.

☐

3.

☐

Quick Question

How does a butterfly grow? Find out.

Knowing is Fun

Our ears and nose never stop growing.

Hobby

As we grow up, we learn to do many activities. An activity that we do for fun when we are free is called a **hobby**. Singing, painting, dancing and drawing are hobbies.

Different people have different kinds of hobbies. Cycling, swimming, **knitting** and gardening are some other hobbies.

Teacher's Pro Tip

Ask children to mark their height on a wall. Ask them to compare this mark with their height six months later.

Identify the hobbies of these children.

1.

2.

3.

Some people enjoy hobbies such as clay-modelling, where they make clay models of toys and other things. Some people also enjoy activities such as baking, **paper quilling** and birdwatching. Some people turn their hobbies into their **occupations**.

Clay-Modelling

Paper Quilling

Quick Question

What are your hobbies? Describe them.

Teacher's Pro Tip

Ask students about the activities that they love to do in their free time. Talk to them about the wonderful hobby of reading.

Words I Learnt

- **adult** - a fully-grown person
- **independently** - without any help
- **knitting** - to make clothes from wool using two long thin knitting needles
- **occupations** - jobs or work people do to earn a living
- **paper quilting** - a craft activity, in which paper is rolled and shaped to create designs

I Learn, I Answer

A. Circle the correct option.

1. All human beings are born as (babies/toddlers).
2. Newborns (cannot/can) sit up and walk.

B. Write Y for yes and N for no.

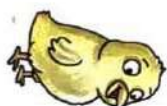

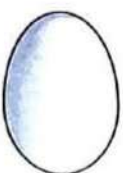

1. Toddlers grow up to become young children. Yes
2. A small seed grows into a chick. No

C. Answer in one sentence.

1. What are living things?
2. What is a hobby?

D. Picture Study

Number the pictures in the correct order.

(4)

(1)

(2)

(3)

Cross-Connect

Fill in the missing letters to complete words.

1. CYCLING

2. PAINTING

I Can Make a Difference

Some people have a hobby of reading newspapers. We get to know about many things happening around us by reading newspapers.

Read today's newspaper and note down five difficult words in your notebook. Find their meanings from a dictionary.

Research skills, Critical thinking

English

My Body

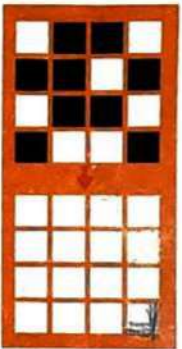

Learning Outcomes

In this chapter, we will:

- explain what organs are.
- name important organs inside the body.
- list ways to take care of the body organs.

Starting Point

1. Copy the pattern.

2. Circle all the body parts you will need to do this activity.

- a. Hands b. Nose c. Eyes d. Ears e. Brain

Learning Ladder

- Organs are important parts of our body. Some organs we can see and touch, for example, our sense organs.
- They are called **external** organs.

- Our sense organs such as eyes, ears, nose and skin are examples of external organs.
- Some organs are inside our body. We cannot see them. They are called **internal** organs.
- They **function** all the time.
- Brain, heart, lungs, stomach and kidneys are internal organs.

Quick Question

Do you think our brain works even when we are asleep? Find out.

Internal Organs

Brain

The brain is located inside our head. It helps us to **remember**, learn and think. Our sense organs help us to see, hear, smell, taste and feel things. The brain receives signals from them and helps us to think and act. It also sends and receives signals from different parts of our body.

Brain

The brain also controls all the other organs of our body. When we touch a hot object, the brain quickly sends a signal to remove our hands from that object.

Taking care of the brain

- ✓ We should read, solve puzzles and riddles to keep our brain active and fit.
- ✓ We should sleep for eight hours at least.
- ✓ While travelling on a motorbike or a scooter, we should always wear a helmet.

Teacher's Pro Tip

Explain how the brain is responsible for the functioning of almost all the internal and external organs of the body.

Heart

The heart pumps blood to the whole body. It is located towards the left side of our chest.

Heart

Knowing is Fun

The size of our heart is roughly the size of our fist.

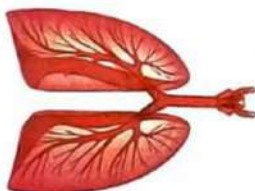

- Taking care of the stomach**
- ✓ We should avoid eating junk food items.
 - ✓ We should eat more fruits and vegetables.
 - ✓ We should eat fresh food. Eating stale food can make us ill.

Quick Question

Why is junk food harmful for our body? Find out.

Lungs

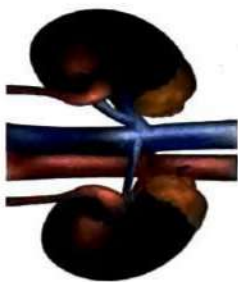

Our body has two lungs, located on either side of our chest. Our lungs help us to **breathe**. When we breathe the air in, our chest **expands**. When we breathe out, it **contracts**.

Lungs

Kidneys

There are two kidneys in our body. They remove the **liquid** waste from our body in the form of **urine**.

Kidneys

We should drink lots of water every day to take care of our kidneys.

Stomach

The food that we eat goes into our stomach. The food breaks down into tiny pieces in the stomach.

Stomach

Teacher's Pro Tip

Explain the importance of having a nutritious diet to students. Explain why food is essential for the functioning of the body.

Bones and muscles

Bones give shape and support to our body. Muscles are **attached** to bones.

Bones and muscles help us to stand, move, play and run. We should eat green leafy vegetables, broccoli, beans and exercise daily to build strong bones and muscles.

Words I Learnt

- **attached**- joined
- **contracts**- becomes small in size
- **expands**- becomes large in size
- **function**- work
- **liquid**- a substance that flows freely and is not a gas or solid, for example, water
- **remember**- recall
- **urine**- the waste liquid that we pass from our body

I Learn, I Answer

A. Fill in the blanks.

1. Our lungs help us to breathe.
2. All the organs of our body are controlled by the brain.

B. Tick (✓) the correct option.

1. Which of these is not a sense organ?
a. ☒ stomach b. ears c. nose
2. Which of these is found inside the body?
a. fingers b. ☒ kidneys c. skin

C. Match the columns.

Column A	Column B
1. stomach	a. help us to stand
2. kidneys	b. located on either side of the chest
3. lungs	c. food breaks down here
4. bones	d. help in removing urine

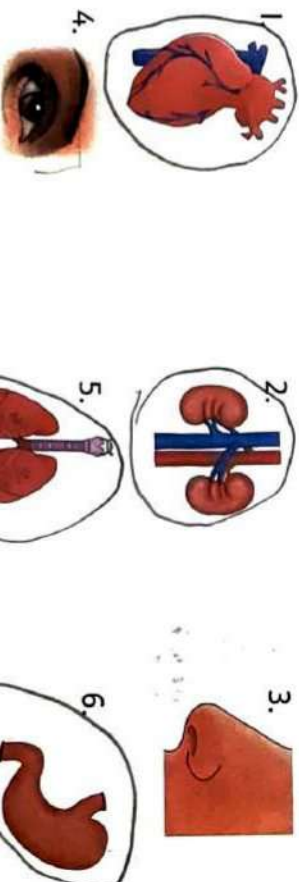

D. Answer in one sentence.

1. What does our brain do when we touch a hot object?
2. Where is the heart located in the body?

E. Picture Study

Circle the internal organs.

Cross-Connect

Science

Find out what a heartbeat is. Can you feel your own heartbeat? How?

I Can Make a Difference

Self-awareness,
Decision-making

Which of these will you choose to keep yourself fit and healthy?

1. Eat uncovered food X
2. Exercise every day ✓
3. Drink plenty of water ✓
4. Avoid green leafy vegetables X
5. Take rest and sleep well ✓

Food I Eat

Learning Outcomes

In this chapter, we will:

- describe the importance of food.
- explain three kinds of food.
- identify the sources of food items.
- define what a balanced diet is.
- list different food habits.

Starting Point

Draw a food item of each colour. Write its name and colour it.

1. Red 	3. Yellow 
2. Purple 	4. Green 

Learning Ladder

Importance of Food

There are many types of food items which help our body in different ways.

Some of them give us energy to do different types of work.

Other food items help us to grow. Some also protect us from falling ill and help us fight diseases.

Sources of Food

We depend on plants and animals for our food needs.

Quick Question

Name your favourite healthy food item.
How does it help you?

Plants give us food items such as fruits, vegetables, grains and pulses. Animals provide us with milk, meat and eggs.

Teacher's Pro Tip

Elaborate on how some food items have protective properties.

Different Eating Habits

- Some people do not eat meat, fish and chicken. They are known as **vegetarians**.
- Those people who eat fish, meat and chicken are called **non-vegetarians**.

Quick Question

Where do we get **paneer** from? Find out.

Knowing is Fun

Food items such as egg, chicken and meat, which we get from animals, are called **poultry products**. Products made of milk, such as curd, butter, cheese and *ghee*, are called **dairy products**.

Kinds of Food

There are three kinds of food—energy-giving food, bodybuilding food and protective food.

Food items such as potato, wheat, rice and sweet potato give us energy. They are called **energy-giving foods**.

Food items such as meat, fish, eggs, pulses and milk build our bones and muscles. These food items also help us to grow. They are called **bodybuilding foods**.

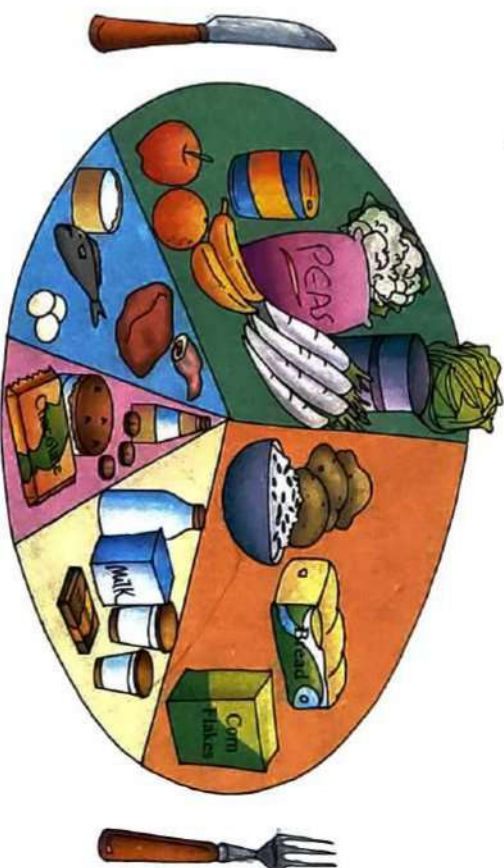

Teacher's Pro Tip

Ask the children to make a food plan. Ask them to write down the names of the food items that they eat in a day and categorise them into energy-giving, bodybuilding and protective foods.

Food items that protect us from falling ill are called **protective foods**. They also heal us when we get injured. Spinach, banana, milk, orange and carrots are some protective foods.

Balanced Diet

Our meals should have food items of all the three kinds. Such a meal is called a balanced **diet**. Eating a balanced diet is essential for our body.

Words I Learnt

- **diet**- the kind of food that a person eats
- **poultry**- animals such as hens and ducks

I Learn, I Answer

A. Fill in the blanks.

1. People who do not eat meat, fish and chicken are called vegetarians.
2. Wheat, rice and potato are major grain foods.

B. Tick (✓) the correct option.

1. Plants give us food items such as fruits.
a. meat b. ✓ fruits c. eggs
2. Animals give us food items such as milk.
a. potato b. ✓ milk c. beans

C. Answer in one sentence.

1. Why do we need food?
2. Who is a non-vegetarian?

D. Picture Study

Are these children eating healthy food items? Write Y for yes and N for no.

1.

☐ Y

2.

☐ Y

3.

☐ N

Cross-Connect

Math

Find the missing number.

$$\text{Apple} + \text{Apple} + \text{Apple} + \text{Apple} = 16$$

$$\text{Apple} + \text{Orange} = 10$$

$$\text{Apple} + \text{Orange} + \text{Apple} = 15$$

$$\text{Orange} = \square$$

I Can Make a Difference

Problem-solving,
Empathy

We should not waste food.
We should take only as much food on our plate as we can finish.

We can help those who do not have enough to eat by giving away any extra food we have.

4 Clothes I Wear

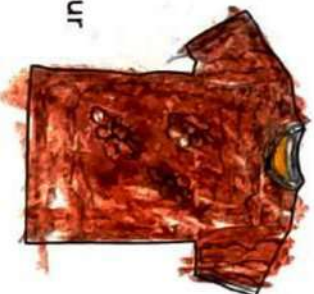

Learning Outcomes

In this chapter, we will:

- explain different kinds of clothes worn in different times of the year.
- describe uniforms worn by people of different professions.
- show different kinds of clothes worn in India.
- name the materials needed for making different clothes.

Starting Point

Make your own design on this T-shirt and colour it. Share your design with your classmates.

Teacher's Pro Tip

Introduce the word 'seasons'. Students are going to learn all about seasons in a separate chapter on seasons. So, here just explain that hot days make up the summer season, cold days make up the winter season and rainy days make up the rainy season.

Learning Ladder

We Need Clothes

Clothes protect us from heat, cold, rain, snow, dust and insect bites. They also make us look good and smart. We wear different types of clothes in different seasons.

Summer clothes

Cotton clothes are worn in the summer season. They keep our body cool.

Winter clothes

Woollen clothes are worn in winter. They keep our body warm. We also wear clothes made of silk in winter. Thermal wear is also worn in winter underneath clothes.

Rainy season

When it rains, we wear raincoats and gumboots. They are mostly made of **waterproof** materials such as plastic and rubber.

Uniforms

There are some people who wear special clothes when they go to work. These clothes are called uniforms.

People of **different professions** wear different uniforms.

Chef

Lawyer

Pilot

Kinds of Clothes Worn in India

People from different parts of India wear different kinds of clothes.

Quick Question

Some parts of our country have their own traditional dresses. Find out the names of at least two of them.

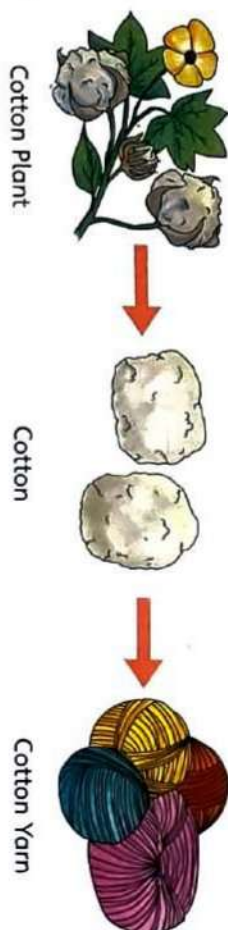

Teacher's Pro Tip

Discuss how people in different parts of India wear different clothes depending on the weather of that place.

Materials Needed for Making Clothes

Cotton

We get cotton bolls from cotton plants. The fibre inside the bolls is then separated and converted into yarn through **spinning**. The yarn is woven into cotton cloth.

Wool

We get wool from animals such as sheep, goat and yak. The hair of these animals are spun into woollen thread. This thread is then used to knit woollen clothes.

Quick Question

What is khadi? Find out.

Knowing is Fun

Mahatma Gandhi made cloth by spinning on the *charkha*.

Silk

We get silk yarn from silkworms. Silk yarn is used to make silk clothes.

Words I Learnt

- **profession** - a job or work that needs special training and education
- **spinning** - making threads from raw materials like cotton
- **waterproof** - something that does not let water in

I Learn, I Answer

A. Fill in the blanks.

1. We wear woolen clothes in winter.
2. cotton clothes are worn in summer.

B. Write T for true and F for false

1. We get cotton from animals such as sheep. False
2. People of different professions wear different uniforms. True

C. Tick (✓) the correct option.

1. What kind of clothes do people wear when it rains?
 - a. clothes made from cotton
 - ☒ b. clothes made from waterproof materials
 - c. clothes made from silk
2. What type of special clothes does a pilot wear?
 - a. thermal wear
 - b. night suit
 - ☒ c. uniform

D. Answer in one sentence.

1. Why do we wear woollen clothes in winter?
2. Where do we get wool from?

E. Picture Study

Match the cloth with the material they are made of.

1.	a. Silk
2.	b. Cotton plant
3.	c. Wool

Cross-Connect

General Knowledge

Collect any four types of fabrics and paste them in a scrapbook. Mention the names of the fabrics. Share how each fabric feels different to touch.

I Can Make a Difference

Skill: Analyzing
Decision-making

Tick (✓) the things we should do to take care of our clothes.

1. When our clothes get dirty, we should wash them. ☒
2. We should hang them out in the air to dry. ☒
3. We should keep clothes lying around the house. ☒
4. We should fold our clothes nicely and keep them inside a cupboard or storage box. ☒

5

1 Celebrate

Learning Outcomes

In this chapter, we will:

- explain the three types of festivals—religious, harvest and national festivals.
- name different harvest festivals.
- describe three national festivals of India.

Something to Think

When do we decorate our house with these objects and why? Share with your partner.

Learning Ladder

Festivals are special days that we celebrate with our loved ones. There are three kinds of festivals—religious, harvest and national. Eid, Diwali, Holi, Gurpurab and Christmas are religious festivals. In this chapter, we will learn about harvest and national festivals.

Harvest Festivals

Festivals that celebrate the time of the **harvesting** of crops are called harvest festivals.

Pongal

Pongal is celebrated in Tamil Nadu after crops are harvested. People decorate their homes with kolam or rangoli. A special delicacy called chakkara pongal is prepared with rice, milk, **jaggery** and coconut.

A woman making kolam on the floor

Onam

Onam is celebrated in Kerala. Rangoli decorations called pookolams are made. This festival is celebrated with folk dances and songs.

A pookalam

Baisakhi

Baisakhi is a popular harvest festival of Punjab. People perform the famous bhangra and gidda. Colourful fairs are also organised at many places.

People performing bhangra on Baisakhi

National Festivals

Festivals that are celebrated by the entire country are called national festivals.

Independence day

Knowing is Fun
Rongoli Bihu is a harvest festival that marks the beginning of Assamese New Year.

We became free from the British

rule on 15 August 1947. We celebrate this day as Independence Day every year.

The Prime Minister **hoists** the national flag at the Red Fort on this day and gives a speech.

Republic day

We celebrate Republic Day every year on 26 January. There is a grand and colourful parade at the India Gate.

Gandhi Jayanti

We celebrate 2 October as Gandhi Jayanti every year. It is the birthday of Mahatma Gandhi.

Quick Question

When do we celebrate Teachers' Day and why? Find out.

Mahatma Gandhi

Teacher's Pro Tip

Explain that we live in the country India. Ask students if they have any prior knowledge of these three national festivals. Then, explain the British rule over India in simple language and then explain why we celebrate Independence Day, Republic Day and Gandhi Jayanti.

Words I Learnt

- harvesting- collecting grains from the fields
- hoists- raises or lifts high
- jaggery- a type of brown sugar

I Learn, I Answer

A. Match the festivals with their correct dates.

Column A	Column B
1. Republic Day	a. 15 August (2)
2. Independence Day	b. 2 October (3)
3. Gandhi Jayanti	c. 26 January (1)

B. Tick (✓) the correct option.

1. A special delicacy called *chakkara pongal* is prepared with rice, milk, jaggery and coconut.
 - a. jaggery
 - b. sugar
 - c. water
 2. People make *pookalam* on Onam.
 - a. Onam
 - b. Pongal
 - c. Baisakhi
- C. Answer in one sentence.
1. Why do we celebrate harvest festivals?
 2. What are national festivals?

D. Picture Study

1. Name the person in the picture. Mahatma Gandhi
2. When do we celebrate his birthday? 2 October

Cross-Connect

English

Unscramble the last words to complete this short poem.

Let us shout aloud—three, two, one (NOE).

Celebrating festivals are always FVN (FNU).

On Republic Day I take part in a ace (ARCE).

And on Onam and Pongal I decorate my Place (PALCE).

I Can Make a Difference

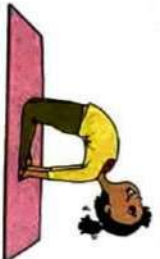

Environmental
awareness,
Problem-solving

We should celebrate all festivals responsibly. Get into pairs and write at least two things you can do to keep your neighbourhood clean during festivals.

Yoga Practise Sequence

Total time: 15 minutes

Activity	Time
1. Sit and relax comfortably. Close your eyes to say a prayer.	2 minutes
	
2. Do these yoga poses.	10 minutes
	Lotus pose
	
	Happy baby pose
	
	Raised feet pose
	
	Camel pose
3. Sit and focus on your breath. Do deep breathing.	3 minutes
	
	Corpse pose

Yoga Pro Tip

1. Always practise yoga asanas under the guidance of an expert or a trained teacher.
2. If you feel uneasy while doing any yoga pose, please stop.

How I Got Home

Piya was coming back from school when she saw a squirrel. She started following the squirrel.

The squirrel saw Piya following her. Scared, the squirrel ran to the other side of the road. Piya, following the squirrel, entered a different lane. Soon, she realised that she had lost her way.

Guess what happened next...

Piya found her way to her home

'I remember now! I came to this post office last week. There was a bank after this post office and then a park.'

I Live With Them

Hi! I am Pia. I live in a nuclear family. Nuclear families have a small number of family members.

This is my friend Irfan. He lives in a joint family which has more number of family members.

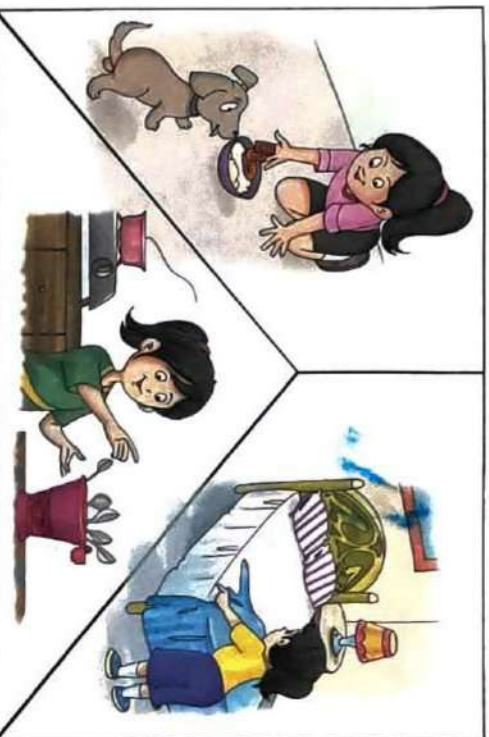

My friend Gurpreet lives with her mother in a single-parent family.

Family members take care of each other.

Living with a family is so much fun. We do many things together like playing games and celebrating special occasions such as festivals and birthdays.

I help my family with many things such as cleaning my room, feeding my pet and laying the table. We should help our family members and take care of them.

I Learn, I Answer

A. Tick (✓) the correct option.

1. A family in which parents live with their children

is a

nuclear family

a. nuclear family

b. joint family

c. single-parent family

2. Gurpreet lives in a _____.

a. joint family

☒ b. single-parent family

c. nuclear family

B. Which of these activities does Pia participate in?
Colour the clouds.

Cleaning
utensils

Feeding her
pet dog

Cleaning
her room

Cooking
food

C. Answer in one sentence.

1. Differentiate between a nuclear and a joint family.
2. What is a single-parent family?

D. Picture Study

Nuclear family

1. Identify the type of family.
2. What are the family

members doing? Feeding her

A-W

Cross-Connect

Art

Make your own family tree. Ask your family members to dip their thumb in watercolour and place it on the branches of the tree.

I Can Make a Difference

Critical thinking,
Collaboration

Saying 'thank you', 'please' and 'sorry' is polite. It is also a good habit. In pairs, share three examples when you can use each of these words among family and friends.

Where I Stay

Learning Outcomes

In this chapter, we will:

- identify and name different kinds of houses.
- explain some special types of houses.
- describe people who help in building a house.

Starting Point

Diya has shifted into a new house with her family. She wants to invite her friends for a house-warming party. Help her create the invitation card.

Learning Ladder

A house protects us from bad weather and keeps us safe. It also makes us feel comfortable.

Quick Question

Name the different kinds of houses in your neighbourhood.

Kinds of Houses

There are different types of houses such as bungalows, huts and apartments. Different materials are used to build different types of houses.

Kuchcha house

Houses made of materials such as straw, mud and wood are called kuchcha houses. They are not very strong.

Hut

Pucca house

Houses made of materials such as bricks, cement, wood and steel are called pucca houses. Apartments and bungalows are some examples of pucca houses. Pucca houses are stronger than kuchcha houses.

Bungalow

Special Types of Houses

Some houses are built as per the weather conditions of a place. They are called special houses.

Houses with sloping roofs

People living in hilly areas have houses with sloping roofs. Sloping roofs make the snow and rain slide off easily.

Teachers' Pro Tip Show the pictures of different types of houses to students and ask them to identify them.

Stilt houses

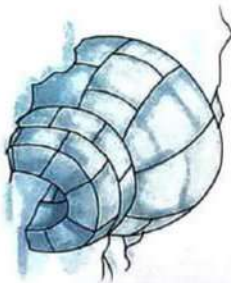

In the areas where it rains heavily, the people prefer to live in stilt houses. They are wooden houses raised at a height.

Stilt House

Igloos

In very cold places, we find special houses called igloos. They are made of snow.

Igloo

Knowing is Fun

People in earlier times lived in igloos. But igloos are not built these days as homes.

Portable houses

Houses that can be moved from one place to another are called portable houses.

Houseboats are houses built on boats. They are mostly found in Kashmir and Kerala.

Houseboat

Some people keep moving from one place to another in search of food, water and work. They are called nomads. Nomads live in tents or caravans.

Tent

Caravan

Teacher's Pro Tip

Explain to the students the connection between a house and the weather conditions of the place.

People Who Build a House

Many people help us to build a house.

- An architect creates the design of a house.
- A mason lays the bricks with cement.
- A carpenter makes the furniture, doors and windows of the house.
- A plumber fits the pipes, water tank and taps in the house.
- An electrician fixes the electrical **attachments** of the house, for example, lights and fans.
- A painter paints the walls and polishes the doors.

A house should have good and proper **ventilation**. There should be plenty of fresh air and sunlight in the house.

Words I Learnt

- **attachments**- tools that are fixed onto machines
- **ventilation**- movement of fresh air around a room

I Learn, I Answer

A. Match the columns.

Column A	Column B
1. igloo	a. mud and straw (5)
2. caravan	b. portable house (4)
3. house with a sloping roof	c. wheels (2)
4. houseboat	d. mountains (3)
5. hut	e. snow (1)

B. Identify these people.

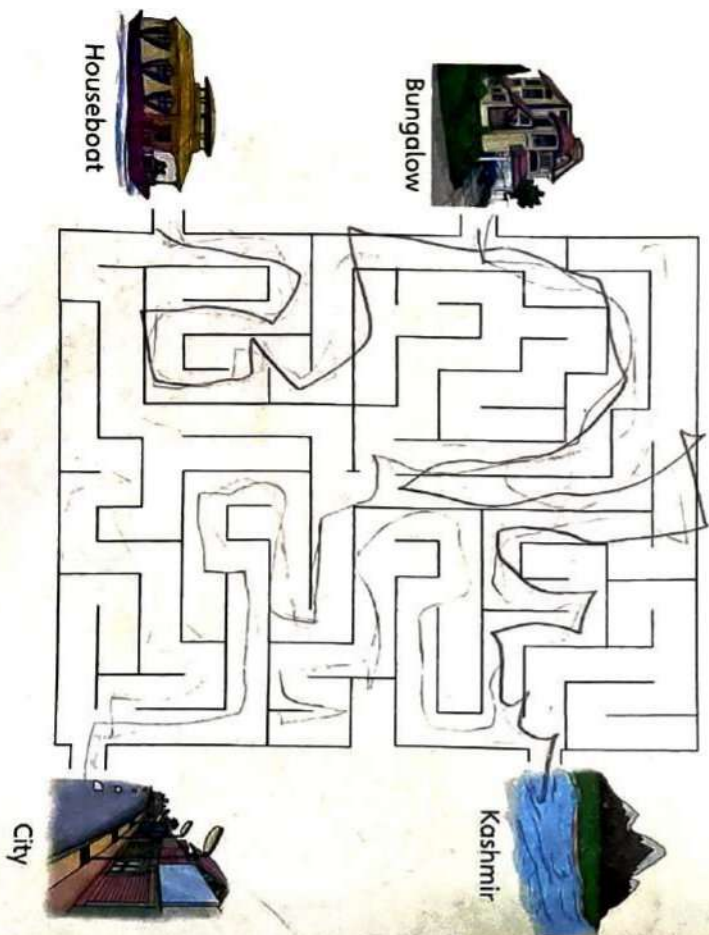

1. A person who lays bricks with cement mason
2. A person who fixes lights and fans in a house electrician
3. A person who creates the design of a house architect

C. Answer in one sentence.

1. What is a kuchcha house made of?
2. Why is a pucca house stronger than a kuchcha house?
3. Why do many houses in mountains have sloping roofs?

D. Picture Study

Where are these houses found?

Cross-Connect

Art

Imagine you are going to move to a new neighbourhood. Think about the kind of house you want to live in. What should be there in that house? Make a plan on a drawing sheet and share it with your classmates.

I Can Make a Difference

Critical thinking,
Collaboration,
Communication

Get into pairs and ask each other these questions. Talk about your responses.

1. What should you do if you see your items such as socks and shoes lying around the house?
2. What should you do after playing with your toys?
3. Why should you not throw fruit peels or wrappers around the house?

8 Our Neighbourhood

Learning Outcomes

In this chapter, we will:

- name the places in a neighbourhood.
- explain the importance of these places in the neighbourhood.
- list ways to take care of the neighbourhood.

Starting Point

A landmark is something, such as a large building, that you can see clearly from a distance and that will help you to know where you are.

Draw a landmark near your house on a drawing sheet.

Learning Ladder

The area **surrounding** our home forms our neighbourhood. People living near our home are our neighbours.

Teacher's Pro Tip

Talk to students about the places in their neighbourhood which they visit frequently.

Places in a Neighbourhood

A neighbourhood has some important places.

Market

A market has shops which sell many things. There are stationery shops, chemist shops and vegetable sellers in a market.

Park

Children play in the neighbourhood park. Parks have swings and slides for children. They also have a path for walking or jogging.

Bank

Some neighbourhoods have banks. We keep our money and **valuables** safe in a bank.

Quick Question

Do you have friends in your neighbourhood? What games do you play with them?

Post office

We go to the post office to send letters to our friends and family members. We can also buy stamps and envelopes from the post office.

Quick Question

Do you know what a stamp is? Find out.

Police station

Some neighbourhoods also have a police station. The police officers help to keep the neighbourhood safe.

Hospital

We go to the hospital when we are sick or **injured**. There are doctors and nurses in a hospital to take care of **patients**.

Knowing is Fun

In case there is a fire, the fire brigade is called. They put out the fire and save lives.

Taking Care of the Neighbourhood

It is very important to keep our neighbourhood clean.

We should not disturb our neighbours.

We can keep our neighbourhood clean by following some rules.

- ✓ We should throw waste materials into the dustbin.
- ✓ We should reuse as much waste materials as we can.
- ✓ We should plant saplings near our house and take care of them.

Quick Question

Which numbers will you dial if you have to call the police and the ambulance? Find out!

Knowing is Fun

An ATM is a cash machine from which people can take out money without going to the bank.

Teacher's Pro Tip Explain the importance of keeping one's neighbourhood clean and safe.

Words I Learnt

- **injured** - hurt
- **patients** - people who are receiving medical treatment in a hospital
- **surrounding** - near or around
- **valuables** - important or costly items

I Learn, I Answer

A. Write T for true and F for false.

1. We can buy stamps from the police station.
2. We go to the hospital when we are sick or injured.

F
T

B. Tick (✓) the correct option.

- Police Station keep our neighbourhood safe.
- a. Doctors
 - b. Police officers
 - c. Firefighters
- a. Banks keep our money and valuables safely.
 - b. Parks
 - c. Banks

C. Answer in one sentence.

1. Why do we go to the hospital?
2. What do we keep in a bank?

D. Picture Study

Name the places in these pictures.

1. post office

2. park

Cross-Connect

Languages

A book club is a group where people can read books and talk about books and stories they like. You can join a book club or make your own book club in your neighbourhood or school. Suggest any one storybook you want your book club members to read.

I Can Make a Difference

Kindness,
Communication

Read what Jasmeet is saying.

There was a small fire in our neighbourhood yesterday. So, my father called up the fire brigade. The firefighters put out the fire.

Many people in our neighbourhood provide us with their services. How you can show kindness to these people. Write any two ways.

Assessment-I

(Based on chapters 1 to 8)

A. Circle the correct option.

1. The heart/kidney removes the liquid waste from our body.
2. The brain/stomach controls all the other organs of our body.
3. A house that moves on wheels is called a tent/caravan.
4. Potato is a protective/energy-giving food.
5. Our body has one/two lungs.

B. What should Pia and Zoya eat? Write **P** for protective foods, **E** for energy-giving foods and **B** for bodybuilding foods.

1. Pia is always sleeping in the class. She feels weak.
2. Zoya falls ill often.
3. Pia and Zoya want to make their bones and muscles stronger.

☐
☐
☐

C. Fill in the blanks.

1. We wear _____ clothes in winter.
2. We get silk from _____.
3. People living near our home are our _____.
4. Independence Day is celebrated every year on _____.
5. Pongal is celebrated in _____.

Test Paper-I

(Based on chapters 1 to 8)

A. Match the columns.

Column A

Column B

- | | |
|-------------------|------------------------------------|
| 1. heart | a. makes wooden furniture |
| 2. carpenter | b. food breaks down here |
| 3. plumber | c. are worn in summer |
| 4. stomach | d. pumps blood throughout the body |
| 5. cotton clothes | e. repairs taps and pipes |

B. Fill in the blanks.

1. The organ that helps us to think and remember is the _____.
2. We should not _____ our neighbours.
3. A complete meal is also called a _____ diet.
4. A _____ is called to put out a fire.
5. An _____ creates the design of the house.

C. Name these houses and write one sentence about each.

1.

2.

1.

2.

D. Write T for true and F for false.

1. Gandhi Jayanti is celebrated on 15 August.
2. We keep costly items in a bank.
3. Food items such as wheat, rice and potato are energy-giving foods.
4. Our lungs help us to store our food.
5. Babies grow up to become toddlers.

☐ ☐ ☐ ☐ ☐

5

Mighty Animals

Great White Shark

The Great White Shark is one of the largest and most powerful animals in the world. It has 300 teeth and still does not chew its food.

Galápagos Penguin

Galápagos Penguins are small penguins with longer and thinner bills. They feed on small fish close to the shore.

Monarch Butterfly

The Monarch Butterfly has the most majestic wings but lives only up to a few weeks.

Sumatran Rhino

Sumatran Rhino is the smallest living species of rhinos. It has two horns and is found in Asia.

Fun Activity

Make an animal face mask. Draw the face of any animal on a drawing sheet. Make holes in place of eyes. Attach a string on both sides.

My Green Friends

Learning Outcomes

In this chapter, we will:

- explain parts of a plant and their functions.
- state how plants are useful to us.
- describe how plants make their food.

Starting Point

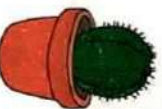

Unscramble the names of these plants.

R S E O

1. Rose

L U T O S

2. Lotus

C S U A T S

3. Cactus

Learning Ladder

Plants are essential for us and our surroundings.

Parts of a Plant and Their Functions

A plant has many parts and each part has a different function.

Leaves

The leaves of a plant help in preparing food for the plant. Leaves are also called the food factory of a plant. Different plants have leaves of different shapes and sizes.

Papaya Leaf

Mango Leaf

Palm Leaf

Spinach, mint and coriander are leaves of plants that we eat as food.

Stem

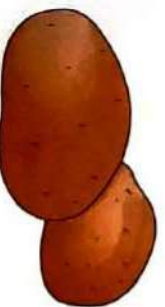

The stem of a plant gives support to the plant. It feeds all the other parts of the plant by providing them with food and water.

Quick Question

How do plants with weak stems get support?

Potato, ginger and sugarcane are stems that we eat.

Potato

Ginger

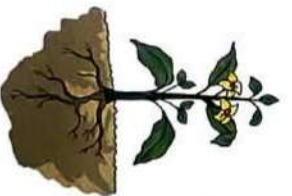

Sugarcane

Roots

The roots help to hold a plant **firmly** to the soil. They spread out under the ground. They take in water and **minerals** from the soil.

Some of the roots that we eat are sweet potato, radish and carrot.

Sweet Potato

Radish

Carrot

Flowers and fruits

The flowers of a plant **often** grow into fruits. Most fruits contain seeds. These seeds can be planted in the soil and new plants grow from them.

Vegetables such as broccoli and cauliflower are flowers that we eat.

Tomatoes and brinjals are also fruits of plants that we eat as vegetables.

We eat the seeds of many plants as pulses and cereals. These include rice, wheat, corn, lentils and peas.

Quick Question

Which vegetable makes you cry when it is cut? Find out.

Cauliflower

Teacher's Pro Tip

Introduce students to the parts of a plant by bringing in an actual potted plant. Let them see and name the parts of the plant.

How Do Plants Make Their Food?

Plants prepare their food in the leaves. They need **carbon dioxide**, water and sunlight to prepare their food. They take carbon dioxide from the air and water and **minerals** from the soil.

Plants give out **oxygen** while preparing food. We breathe in oxygen.

Knowing is Fun

A strawberry is the only fruit with seeds on the outside.

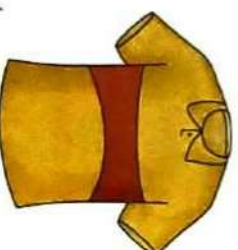

Plants are Useful

Plants are useful to us in many ways.

1. We get food items such as vegetables, fruits, grains, cereals, pulses, nuts and spices from plants.
2. Many plants such as neem and basil have medicinal properties.
3. Plants clean the air that we breathe by taking in carbon dioxide and giving out oxygen.
4. Plants provide shade and shelter to human beings, animals and birds.
5. We make cloth from the fibres or threads of jute and bolls of cotton plants.

Jute Bag

Cotton T-shirt

Teacher's Pro Tip

Discuss the cleansing effect that plants have on the atmosphere. Ask the children to adopt practices such as planting a tree on their birthday and taking care of it.

Words I Learnt

- carbon dioxide- a gas that we breathe out
- firmly- strongly
- minerals- substances that are naturally present in soil
- often- many times
- oxygen- a gas that is present in air and water and is necessary for people, animals and plants to live

I Learn, I Answer

A. Write T for true and F for false.

1. Seeds of some plants are eaten as food.
2. Potato is the root of a plant.

T
F

B. Tick (✓) the correct option.

1. Plants give out oxygen while preparing food.
a. carbon dioxide b. oxygen c. air
2. Leaves are called the Food factory of a plant.
a. ✓ food b. water c. lunch

C. Fill in the blanks.

1. Plants take in carbon dioxide from the air.
2. The stem of a plant carries food and water to all parts of the plant.

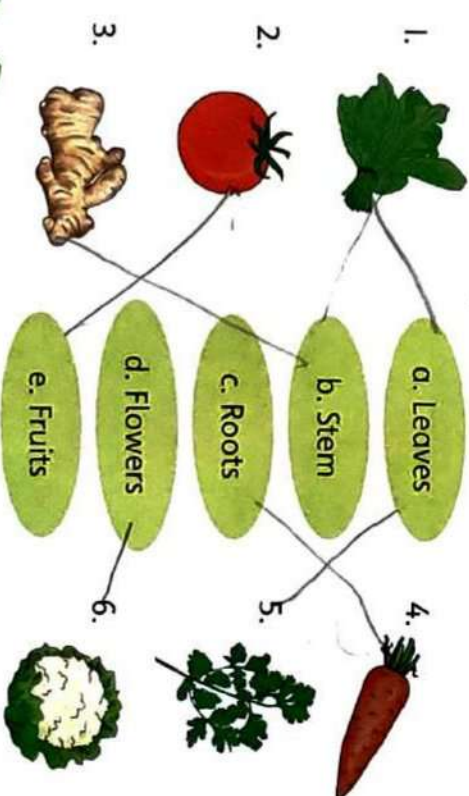

D. Answer in one sentence.

1. From where do plants get water and minerals?
2. Name two plants that have medicinal properties.

E. Picture Study

Which parts of a plant are these? Match them correctly.

Cross-Connect

Science

Collect different types of five fallen leaves. Then, paste those leaves in a scrapbook. Find out their names. Observe shapes and sizes of the leaves.

I Can Make a Difference

Critical thinking,
Problem-solving,
Communication

Plants help in purifying the air around us. Some plants do not need too much sunlight and can remain indoors. What will you say to your parents or elders to convince them about having an indoor plant?

10 The Animal Kingdom

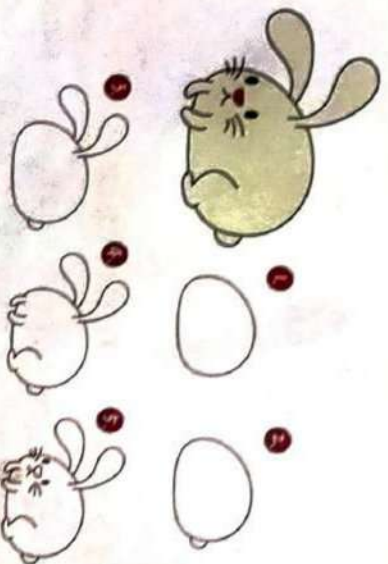

Learning Outcomes

In this chapter, we will:

- identify and name two kinds of animals—wild and domestic.
- explain where different wild animals live.
- identify and name shelters where domestic animals live.
- describe what different animals eat.
- explain how animals are helpful to us.

Starting Point

Follow the steps to draw a bunny on a drawing sheet.

Learning Ladder

Kinds of Animals

There are two kinds of animals—wild animals and domestic animals.

Wild animals such as elephants, lions and tigers live in forests.

Most domestic animals live on farms and as pets.

Where animals live

The domestic animals that live on **farms** are called farm animals. Cows, buffaloes, hens, ducks, sheep and goats are some farm animals.

Name these farm animals.

1. cow
2. goat
3. hen
4. sheep
5. buffalo

Farm animals help us in many ways. We get milk, meat, egg and wool from them.

Teacher's Pro Tip

Talk about insect homes as well. Discuss how ants make tunnels and how bees produce honey in a bee nest. A beehive is a human-made shelter for bees.

Some domestic animals live in shelters built by us.

Cows live in a shed.

Horses live in a stable.

A dog lives in a kennel.

Hens live in a coop.

Some wild animals live in **caves**.

Caves are natural, **hollow** places at the side of hills or mountains.

Lions and bears live in caves.

Some animals live on trees.

Monkeys and squirrels live on tree branches. Many birds make their nests on trees.

Quick Question

What are beehives?
Where do bees store honey?
Find out.

Animals such as rats and rabbits dig holes in the ground and live there. Their homes are called **burrows**.

Water animals live in ponds, rivers, seas and oceans. Animals such as fish, whales, sharks and dolphins are usually found in seas and oceans.

What Animals Eat

Some animals eat only plants. They are called **herbivores** or **herbivorous** animals. Horses, cows, goats, giraffes and elephants are herbivorous animals.

Animals such as lions, tigers and wolves eat the flesh of other animals.

They are known as **carnivores** or **carnivorous** animals.

Animals such as crow and bear eat both meat and plants. They are called **omnivores** or **omnivorous** animals.

Quick Question

Animals are our friends. They help us in many ways.

Which animal is also known as the best friend of human beings? Find out.

- We get food items such as egg, milk and meat from animals.
- We get wool from animals such as sheep and goat.
- Animals such as bullocks help in **farming**.
- Some animals such as horses and donkeys help in carrying load.

Teacher's Pro Tip

Discuss with students that animals are our friends and we should take care of them. We should be kind to the animals in our neighbourhood and never tease them.

Words I Learnt

- **farm** - an area of land used for growing crops or keeping animals
- **hollow** - with empty space inside

I Learn, I Answer

A. Choose the correct option.

1. (Lions/Horses) live in caves.
2. The animals that eat the flesh of other animals are called (herbivores/carnivores).

B. Fill in the blanks.

1. birds make their nests on trees.
2. We get wool from sheep and goat.

C. Match the animals with their houses.

Column A	Column B
1. monkey	a.
2. horse	b.
3. rabbit	c.

D. Answer in one sentence.

1. How are wild animals different from domestic animals?
2. What do omnivorous animals eat?

E. Picture Study

Name them. Which one of these can you keep at home? Why?

1. lion

2. parrot

Cross-Connect

Math

Calculate and use the correct sign <, >, =.

16 cats + 20 dogs 48 owls - 12 bears

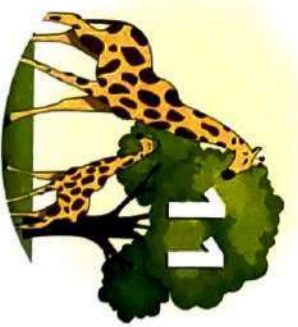

I Can Make a Difference

Critical thinking,
Decision-making,
Collaboration

A police officer wants to keep an animal for guarding a building. The animal should be intelligent, easy to train and have sharp senses. In pairs, discuss which animal will be most suitable and why.

Rabbit	Dog	Goat
--------	-----	------

Air and Water

Learning Outcomes

In this chapter, we will:

- explain why we need air.
- explain what wind, breeze and storm are.
- define air pollution and how we can keep the air clean.
- state properties of water and its common uses.
- name different sources of water.
- list ways to save water.

Starting Point

What are these children doing?

- 1.
- 2.

played with

blowing balloon

1. The boy is getting his football filled with air.
2. The girl is blowing air into a balloon.

Learning Ladder

Air is all around us. We cannot see it as it is colourless. We can only feel it.

Why Do We Need Air?

We cannot live without air. We breathe in oxygen which is one of the gases present in the air.

Air helps kites and birds to fly. Air also helps vehicles such as boats and aeroplanes to move.

Breeze and storm

Moving air is called wind.

When the air blows gently, it is called breeze while a very strong wind is called storm.

Air Pollution

Air gets **polluted** due to the smoke coming out of factories and vehicles. This smoke has harmful gases which pollute the air. Breathing this air can cause diseases.

Quick Question

Why do wet clothes dry faster when we put them outside? Find out.

Make the polluted air clean:

- By planting more trees
- By asking our parents or elders to get their vehicles checked regularly

Water and Its Uses

Water is essential for us. All of us need water to live. There are many uses of water in our daily life.

We need water for drinking, bathing, cleaning, cooking food and washing clothes.

Water is colourless. It has no shape. It takes the shape of any container it is **poured** into.

Sources of Water

Rain is the main source of water. Rainwater fills rivers, lakes, ponds and oceans. Some of the

rainwater also **seeps** into the ground. We take out this underground

water by digging wells or using handpumps.

Quick Question

How is ice formed from water? Find out.

Can we drink this water?

The water that we get from these sources is not safe for drinking. We must boil or filter the water before drinking it.

Saving Water

Water is very important for all of us. We should try to save it.

We should use a bucket and mug for bathing.

We can use the leftover water in our water bottles to water the plants.

We should get a leaking tap repaired.

Teacher's Pro Tip

Discuss ways of saving water. Tell students different ways such as using the water used to wash vegetables to water the plants.

Words I Learnt

- polluted - dirty
- poured - made water flow from one utensil to another
- seeps - enters into

I Learn, I Answer

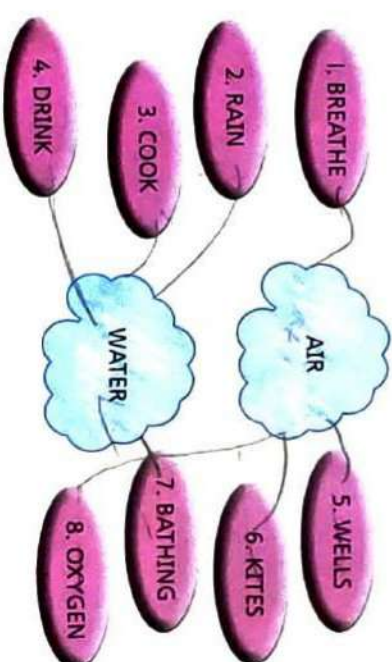

A. Fill in the blanks.

1. Moving air is called wind.
2. Plants should be planted to keep the air clean.

B. Circle the odd one out.

- | | | | |
|----------------|--------------|----------------|------------------|
| 1. a. football | b. tyre | c. balloon | d. <u>pencil</u> |
| 2. a. wind | b. breeze | c. <u>snow</u> | d. storm |
| 3. a. kite | b. aeroplane | c. <u>lamp</u> | d. birds |
| 4. a. pond | b. pool | c. river | d. <u>cloud</u> |

C. Match the words to the correct bubbles.

D. Answer in one sentence.

1. Name the main source of water.
2. What is a storm?

Rain is the main source of water. Very strong wind is a storm.

E. Picture Study

The tyre of Pia's cycle got punctured. How will it be repaired? Find out.

Cross-Connect

Art (Music)

A flute is a musical instrument that uses air to produce sound. Such musical instruments are called wind instruments. Collect pictures of five wind instruments and paste them on a chart.

I Can Make a Difference

Critical thinking
Environment
awareness

Underline the actions in red that can pollute air. Underline the actions in blue that can pollute water.

1. Smoke from chimneys and factories
2. Throw garbage into rivers
3. Burn garbage in the open area
4. Wash clothes in lakes and rivers
5. Smoke from cars and other vehicles
6. Throw garbage into a water well
7. Household waste thrown into rivers and lakes

12 Seasons

Learning Outcomes

In this chapter, we will:

- define weather and season.
- describe different seasons—spring, summer, monsoon, autumn and winter.

Starting Point

1. Match these correctly.

a.

b.

c.

i.

ii.

iii.

2. What do you like to eat on:

a. hot days

b. cold days

Learning Ladder

Weather

A day can be sunny, windy, rainy, stormy, **pleasant** or cold. The condition of a day is called **weather**. The weather of a place may change from day to day.

Seasons

When we have the same weather conditions for a longer period of time, it is called a **season**.

A year has different seasons—spring, summer, monsoon, autumn and winter.

Spring season

- The spring season is a short season which comes before the summer season.
- The weather is pleasant during this season.
- Many bright and colourful flowers bloom in spring.
- The trees grow new leaves and plants grow new stems and leaves.
- We celebrate Holi during this season.

Knowing is Fun

Hot winds called loo blow in summer season.

Quick Question

Which is your favourite season and why?

Summer season

- The summer season comes after spring.
- The days are hot and sunny.
- We wear light, cotton clothes during this season.
- We use fans, air coolers and air conditioners to keep ourselves cool.
- We love to eat mangoes, watermelon and ice cream in summer.

Rainy season

- The rainy season is also called the monsoon season.
- It rains very often during this season.
- We use umbrellas, raincoats and gumboots on rainy days.
- Everything looks fresh and green as the rain washes away all the dust and dirt.

Autumn season

- The autumn season is a short season that comes after monsoon.
- Many trees shed their leaves during this season.

Teacher's Pro Tip Ask students about their favourite season and the activities that they like to do in that season.

- The weather is neither too hot nor too cold.
- Diwali  is celebrated during this season.

Quick Question

The leaves of trees change their colour from green to brown in autumn. Why does it happen?

Winter

- The winter season comes after autumn.
- Cold winds blow during this season.
- It also snows in some places.
- We wear woollen clothes to keep ourselves warm.
- We celebrate Christmas  during this season.

Words I Learnt

- pleasant- nice and enjoyable
- shed- (here) to fall off naturally

I Learn, I Answer

A. Write T for true and F for false.

1. We wear light, cotton clothes in winter.
2. It snows in the rainy season.

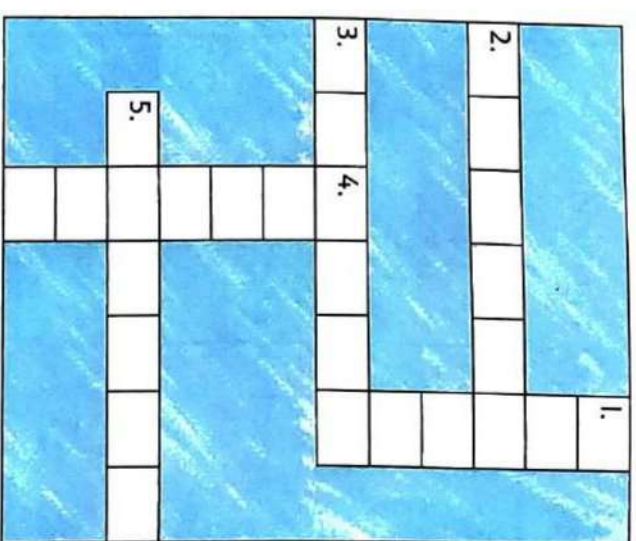

T _____
F _____

B. Tick (✓) the correct option.

1. It is neither too hot nor too cold during _____.
a. autumn b. summer c. winter
2. Many new flowers bloom in _____.
a. summer b. monsoon c. spring

C. Solve the crossword.

Down (↓)

1. Christmas is celebrated in this season.
4. This season comes after the hot summer season.

Across (→)

2. Trees shed their leaves in this season.
3. The Sun shines brightly in this season.
5. We wear such clothes in the summer season.

D. Answer in one sentence.

1. Define weather.
2. What are seasons?

E. Picture Study

Match these objects with the correct season.

1. 	a. autumn
2. 	b. spring
3. 	c. monsoon
4. 	d. summer

Cross-Connect

English

Think about the seasons and words that come to your mind.
List words related to each season in the table.

Summer	Monsoon	Winter

I Can Make a Difference

Self-awareness,
Critical thinking

There may be a season you like the most whereas another season you may not like that much. Think carefully then fill in the table.

Season	Why do I like it?	Why do not I like it?

Animal Walk

Bear Walk

1. Place your hands on the ground in front of you.
2. Keep your lower back high in the air.
3. Step forward with your right hand and left foot. Then, step forward with the other hand and foot.

Crab Walk

1. Sit down with your hands on the side and fingers pointed towards your feet.
2. Push up on your hands and feet so that your body is like a table. Tighten your stomach.
3. Start walking forward by moving your left hand and right foot; and then your right hand and left foot.

My Fitness Checklist

Tick (✓) the fitness skills you use while doing animal walk, yoga poses and playing tag games.

1. Walking	6. Stretching	
2. Crawling	7. Running	
3. Rotating	8. Throwing	
4. Catching	9. Pushing and pulling	
5. Balancing	10. Jumping	

How Luna Got her Dog Back?

A little girl called Luna had a dog, Bow-Wow. One day while playing Bow-Wow ran to fetch a ball, but he did not return. Luna looked for her pet everywhere. In her heart she wished Bow-Wow to come home soon.

Suddenly a Witch appeared...

Ha Ha Ha! Luna, I can bring Bow-Wow back. But you have to build four houses for me at different places. And show me from where I can get lots of water.

I will build four houses for you and tell you all about the water bodies. Please bring Bow-Wow back.

Luna built houses for the Witch on:

MOUNTAIN	PLATEAU	PLAIN	DESERT
----------	---------	-------	--------

She showed the Witch these water bodies:

RIVER	LAKE and POND	SEA and OCEAN
-------	---------------	---------------

The Witch found Bow-Wow and sent him home to Luna.

Luna, I am coming home.

Story Activity

1. Get in pairs and discuss what a mountain, plateau, plain and desert are. You can take the help of your teacher or an elder.
2. Now draw them on a drawing sheet and colour them.

Our Earth

Learning Outcomes

In this chapter, we will:

- explain that we live on the Earth.
- identify and name different landforms.
- describe different water bodies.

Starting Point

Draw a river flowing from the mountains.

Learning Ladder

Earth

We live on Earth. The Earth has land and water. But the land is not the same everywhere. Let us know more about different kinds of **landforms** on Earth.

Earth

Hill and mountain

- A **hill** is a landform which is higher than the land surrounding it.
- A very high and tall hill is called a **mountain**.
- The highest point of a mountain is called its **peak**. Peaks of mountains are usually covered with snow.

Mountain

Knowing is Fun

A lowland lying between mountains or hills is called a **valley**.

Plain

- A plain is a large area of flat land.
- Plains have rich soil. Crops grow in large quantities in the plains.
- Roads can be easily built on plains.
- Because of all these reasons, people prefer to live in the plains.

Plain

Plateau

A highland that is flat at the top and looks like a table is called a **tableland** or a **plateau**.

Quick Question

Where would you like to live—in the plains, on the hills or in the desert? Why?

Plateau

Desert

- A **desert** is a large area covered with sand. The land is dry as it receives little or no rainfall.
- Not many plants and animals are found here. A common plant that grows here is cactus.
- Camel is a common animal found in a desert. It is also called the **ship of the desert**.

Desert

Water Body

Earth has different water bodies.

Rivers, lakes and ponds

- Rivers are large water bodies that flow through mountains and plains towards oceans and seas.

River

- Many rivers **originate** in mountains when the snow melts.
- Lakes and ponds are **landlocked** water bodies.
- Lakes are large water bodies and ponds are smaller than lakes.

Oceans and seas

- Oceans and seas are large saltwater bodies on Earth. Their water is not fit for drinking.
- Oceans are largest water bodies whereas seas are smaller than oceans.

Ocean

Quick Question

Salt is made from seawater. Find out how.

Teacher's Pro Tip

Discuss with students how rivers flow into seas and oceans. Compare the fresh water of the rivers with the salty water of the seas.

Words I Learnt

- **landlocked** - surrounded by land on all sides
- **originate** - (here) to begin or appear for the first time in a particular place

I Learn, I Answer

A. Write T for true and F for false.

1. The land on the Earth is not the same everywhere. _____
2. Ponds are the largest water bodies. _____

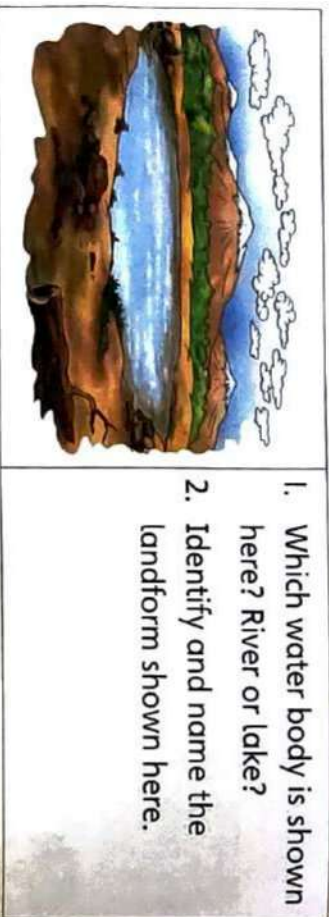

B. Fill in the blanks.

1. The highest point of a mountain is called a _____.
2. The _____ is called the ship of the desert.

C. Answer in one sentence.

1. What is a plateau?
2. Why do more people live on plains as compared to mountains?
3. Why cannot we drink the water of oceans and seas?

D. Picture Study

Cross-Connect

Science

Cactus is a desert plant. Find out how it survives in a desert.

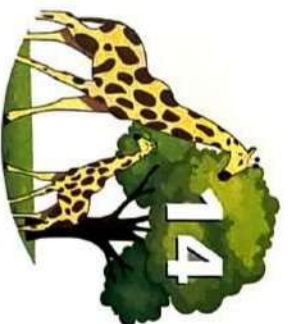

I Can Make a Difference

Problem-solving
Critical thinking

In pairs, talk about what we can do to keep water bodies clean.
Write any three ways.

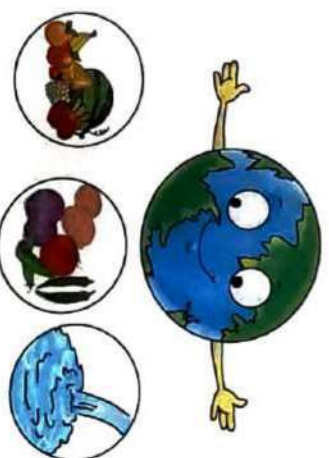

84

I Will Take Care

Hi! I am Rohit. Do you know which planet do we live on? We live on the Earth.

It is very important to take care of our Earth. The Earth provides us with everything we need.

85

People are harming the Earth in many ways. They are destroying forests for constructing buildings and railway tracks. They are throwing garbage into rivers, making the water dirty and harming many water animals.

Can you see the smoke coming out of these vehicles? This smoke is harmful for us and our environment.

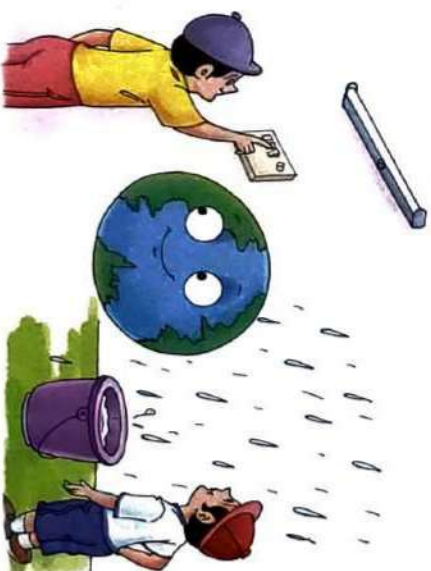

Do you know that we can save our Earth by following some rules?

Rule 1: We can keep our neighbourhood clean and green by planting trees and throwing garbage into a dustbin.

Rule 2: We should not throw away the things which we can reuse, like paper and plastic bottles.

Rule 3: We can also save our Earth by not wasting water. We should save electricity by switching off fans and lights when not in use. Our planet is beautiful. Let us take good care of it.

I Learn, I Answer

A. Fill in the blanks.

1. People destroy forests for constructing _____.
2. Throwing _____ into rivers is harmful for the water animals.

B. Tick (✓) the correct option.

1. We should keep our neighbourhood _____ and green.
 - a. healthy
 - b. clean
 - c. happy
2. Smoke from vehicles is _____ for the environment.
 - a. harmful
 - b. good
 - c. better

C. Answer in one sentence.

1. How are people harming the Earth?
2. Why is it important to take care of the Earth?
3. Mention any two ways by which we can save our Earth.

D. Picture Study

Describe each picture in one sentence. Are these activities good for our Earth? Write Y for Yes and N for No.

1.

2.

Cross-Connect

One day Javed saw his neighbour throwing garbage from her balcony. He complained to his father.

Think and write what Javed must have said to his father in two sentences.

English

I Can Make a Difference

We should use cloth bags. Cloth bags can be reused many times. Think about any one item that can be reused many times.

Critical thinking
Self-awareness

15 High Above the World

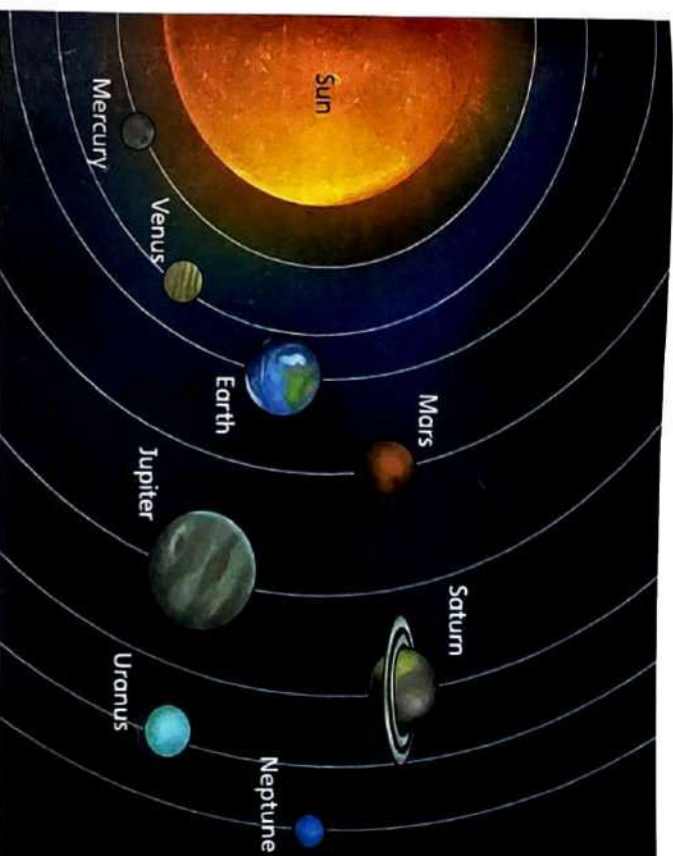

Hi! I am Riya. The night sky is so beautiful! I love looking at it. There is a large bright Moon in the sky. There are so many stars too. They shine so brightly!

We live on the Earth. The Earth and the Sun are parts of the solar system.

The Sun is the head of this family. It is at the centre of the solar system.

This is the solar system. The solar system has the Sun, the eight planets and their moons. Can you count the number of planets shown in this picture? _____

The planets in our solar system are in this order (based on the distance from the Sun)—Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus and Neptune.

Mercury is nearest to the Sun and Neptune is the **farthest** from the Sun.

These planets move around the Sun. They get their light and heat from the Sun.

Do you see the planet with beautiful rings? It is Saturn. Jupiter is the largest planet in the solar system.

The Moon is very close to the Earth and moves around it. The Moon keeps changing its shape. It also gets its light from the Sun.

The night sky also has **numerous** stars. Stars are big in size but look small because they are far away from us. Stars have their own light. The Sun is also a star!

The Earth is the only planet where living things are found. Do you know why? This is because of the presence of air and water on its surface.

Our Earth is a beautiful planet. We get everything that we need from the Earth. Let us take good care of it.

Words I Learnt

- farthest- at a large distance
- numerous- many

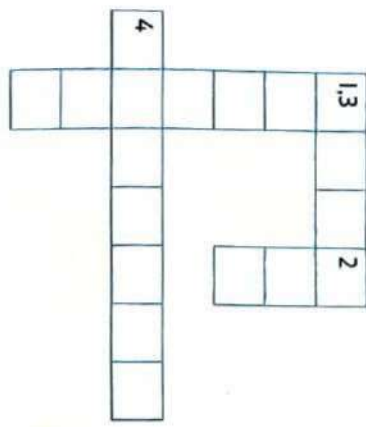

I Learn, I Answer

A. Fill in the missing letters.

1. They get their light from the Sun. P _ A _ E T
2. It moves around the Earth. M _ O _
3. This planet has rings. S A _ U _ N
4. It is the only planet to have life. E _ R _ H

B. Complete the word grid.

- Across**
1. The planet next to the Earth
 4. The largest planet
- Down**
2. Gives light to planets
 3. The planet nearest to the Sun

C. Tick (✓) the correct option.

1. The Moon gets its light from the _____.
 - a. Saturn
 - b. Sun
 - c. Stars
2. _____ is the largest planet in the solar system.
 - a. Earth
 - b. Mercury
 - c. Jupiter

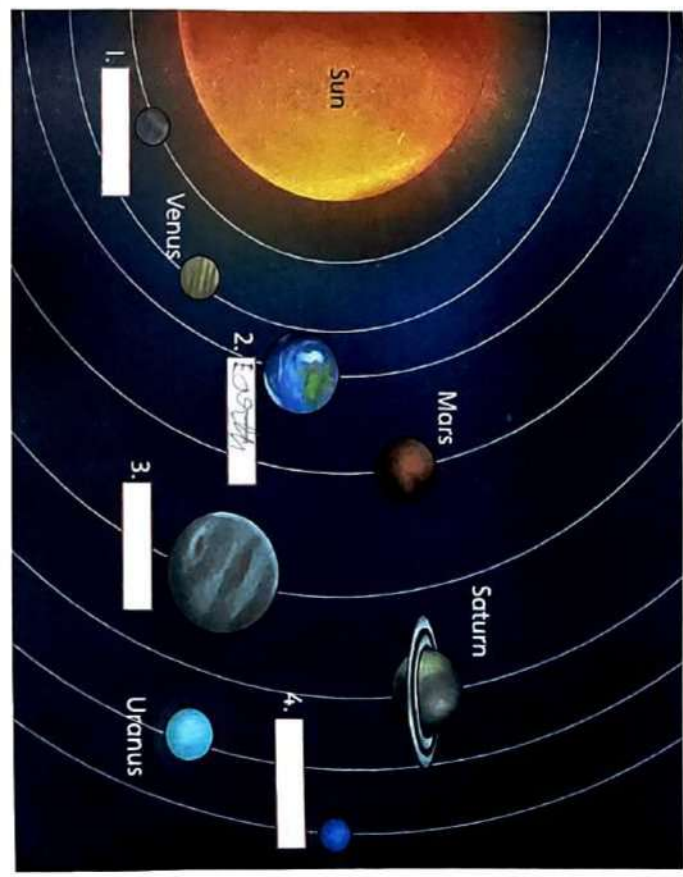

D. Answer in one sentence.

1. What is the solar system?
2. Why is life found on the Earth?
3. What are stars?

E. Picture Study

Name these planets of the solar system.

Cross-Connect

Science

Why planets such as Uranus and Neptune are coldest among all planets? Find out.

I Can Make a Difference

Critical thinking, Collaboration

The Sun provides heat and light to the Earth. Without heat and light, life is not possible on the planet. In groups of four, find out what else we need to live on the Earth.

16 My Country: India

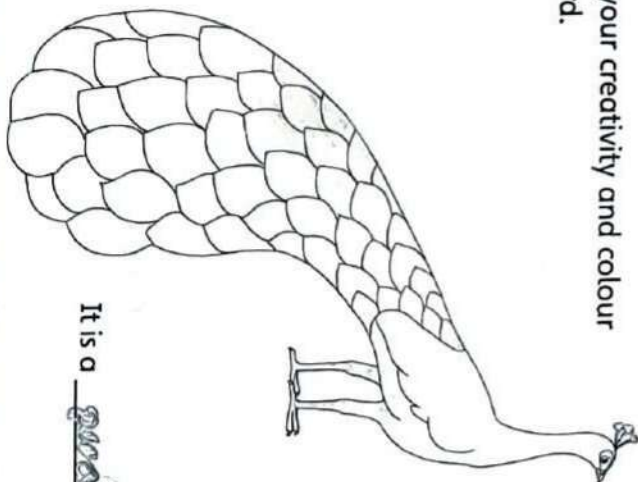

Learning Outcomes

- In this chapter, we will:
- state that we live in a country, India.
 - identify and name the national symbols of India.

Starting Point

Show your creativity and colour this bird.

It is a peacock.

Learning Ladder

We live in India. Our country has some **national** symbols that are **unique**. They are the **pride** of all Indians.

National Flag

The **national flag of India** is known as the tricolour or *tiranga*. It has three colours—saffron, white and green.

National Animal

Royal Bengal Tiger is the national animal of India. It represents strength, power and grace.

National Bird

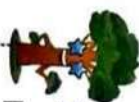

Peacock is the national bird of India. It represents beauty and grace. It is a beautiful bird with a long blue neck and colourful feathers.

Quick Question

What do the different colours of the national flag of India represent? Find out.

Knowing is Fun

Peacocks are the largest of all birds that fly. Other birds such as ostrich and emu are larger than peacocks, but they cannot fly.

National Flower

Lotus is the national flower of India. It represents truth, knowledge and wealth.

National Anthem

Jana Gana Mana is the national anthem of India. When the national anthem is played, we should stand in attention with our hands on the sides.

Teacher's Pro Tip

Make students aware of the importance of having national symbols of India and that we all should respect them.

Words I Learnt

- **national symbols**- symbols/signs used to represent a country and show unity

- **unique**- very special

I Learn, I Answer

A. Write the national symbols that represent the following.

1. It represents strength and power. _____
2. It represents beauty and grace. _____
3. It represents truth, knowledge and wealth. _____

B. Match the columns.

Column A	Column B
1. National flower	a. Peacock
2. National anthem	b. Royal Bengal Tiger
3. National bird	c. Lotus
4. National animal	d. <i>Jana Gana Mana</i>

C. Answer in one sentence.

1. What is India's national flag known as?
2. Describe the national bird of India.

D. Picture Study

1. Identify the flower shown here.
2. What does the national flower of India represent?

Cross-Connect

Make a chart on the national symbols of India.

Art

I Can Make a Difference

Respect for India, Responsibility

When the national anthem is played or sung, we should stand in attention with our hands on the sides. We should do this to show respect for our country.

Alia and the Birthday Party

Hi! I am Alia. Oh! It is 7 a.m. It is time for me to get ready for school.

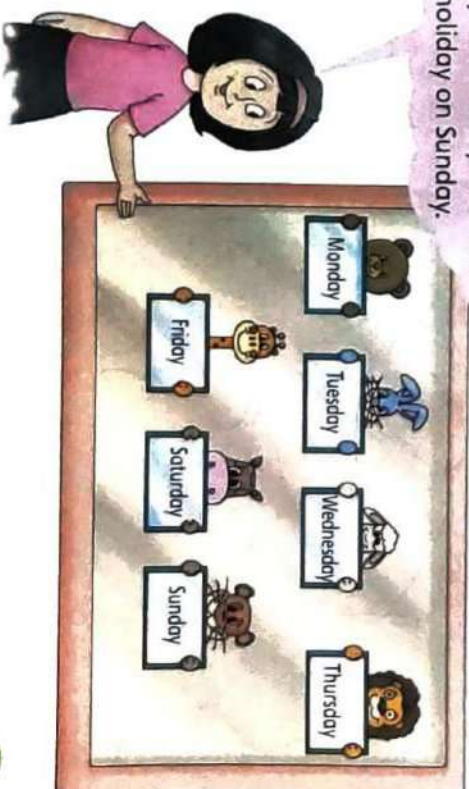

A clock tells us what time it is. It has three hands. The short hand of the clock shows the hour, the long hand shows the minutes and the thinnest hand shows the seconds.

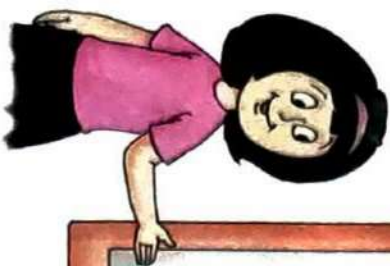

I got an invitation for Pia's birthday party. It is on Thursday, 23 June.

There are seven days in a week—Monday, Tuesday, Wednesday, Thursday, Friday, Saturday and Sunday. We have a holiday on Sunday.

Seven days make a week and 365 days make a year. A year is divided into twelve months—January, February, March, April, May, June, July, August, September, October, November and December. Some months have 30 days while some have 31. February is the only month having 28 days. February has 29 days after every four years. That year is called a leap year.

Mummy is taking me to Pia's house. She knows the way to her house. It is good to know the directions to a place. Directions tell us where a place is.

There are four cardinal directions—North, South, East and West. They help us to find our position wherever we are and to locate something.

We can use the Sun to find where we are or in which direction we want to go. The Sun rises in the East and sets in the West. When we stand facing the rising Sun, we are facing East and have our back towards West. On our left is North and on our right is South.

I Learn, I Answer

A. Name these months.

1. The second month of the year _____
2. The month which comes after May _____

B. Fill in the blanks.

1. Wednesday, _____, _____, Saturday
2. _____, Monday, _____, _____
3. May, _____, _____, August
4. October, November, _____, _____

C. Tick (✓) the correct option.

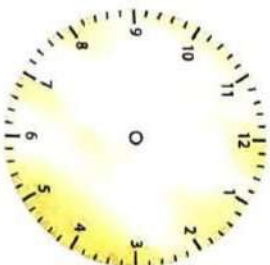

1. _____ has 29 days in a leap year.
 - a. March
 - b. February
 - c. July
2. Wednesday comes before _____.
 - a. Friday
 - b. Tuesday
 - c. Thursday

D. Answer in one sentence.

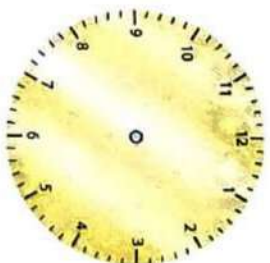

1. How many days are there in a week?
2. How many months are there in a year?

E. Picture Study

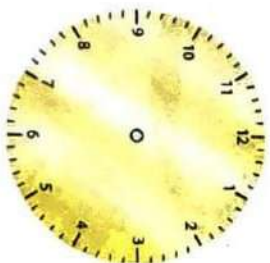

Draw the hands of the clock to show these timings.

6 o'clock

8 o'clock

11 o'clock

Cross-Connect

Math

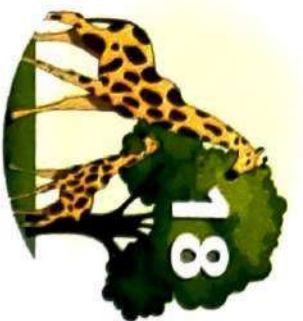

The garbage collector comes for only 4 days in a week. How many times does he come in four weeks?

I Can Make a Difference

Punctuality,
Self-awareness,
Critical thinking

Ruben had to go to a birthday party yesterday. The time was 5 o'clock in the evening. He reached there at 6 o'clock. By that time the cake was cut. Why could not Ruben enjoy the cake cutting? Share your thoughts with your partner.

18 Communication Today

Learning Outcomes

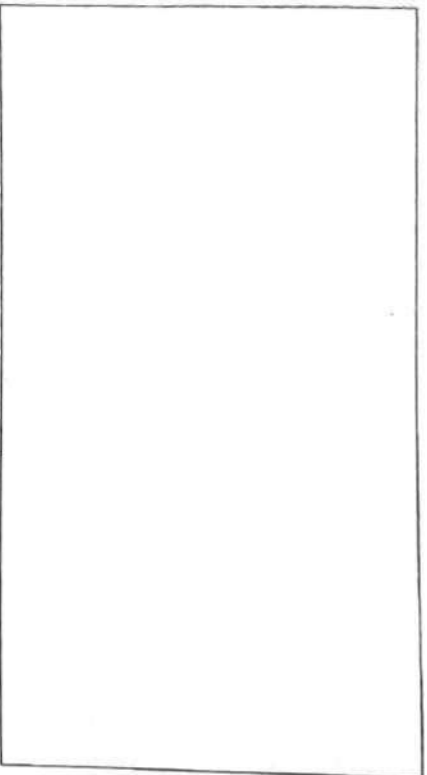

In this chapter, we will:

- define communication.
- describe different means of communication in the past and present.
- explain what mass communication is and sources of mass communication.

Starting Point

Draw a letterbox and colour it. Write what it is used for.

A letterbox is used for _____

Learning Ladder

Communication

Expressing ideas or sharing information by talking or writing is called **communication**.

The objects which help us in communicating with people are called means of communication. Telephones, smartphones, mobile phones, computers and letters are some means of communication.

We also communicate through **gestures** and **facial** expressions. Communication without actually talking is called **non-verbal communication**.

Quick Question

What is sign language? Find out.

Knowing is Fun

The first telephone was invented by Alexander Graham Bell.

Communication in the Past and Present

In the past, people used to communicate with the help of pigeons, messengers and smoke signals.

Messages were written and tied to the legs of pigeons.

These pigeons used to be trained to deliver messages.

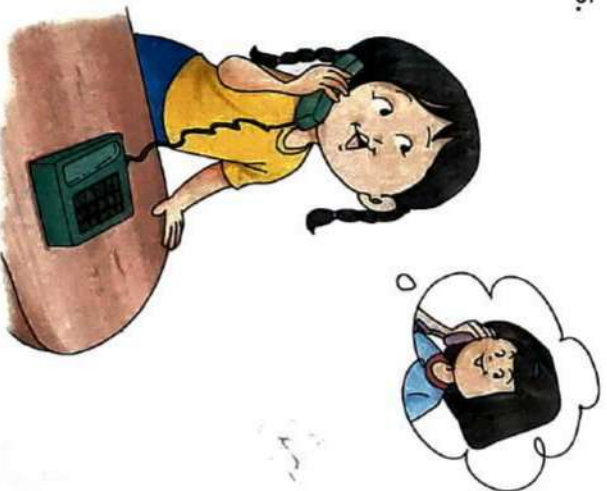

Some messengers used to carry messages from one place to another.

Messengers were sent mostly by one king to another.

Smoke signals were used to give a message of danger.

Nowadays, we use

telephones, smartphones, mobile phones, letters and the Internet to communicate with our friends and family members.

Teacher's Pro Tip

Show various facial expressions to students and ask them to guess the emotions.

Mass Communication

Sharing the same information and ideas with a large number of people is called **mass communication**.

The means of mass communication include newspapers, magazines, television, the Internet and radio.

Newspapers tell us about important events.

They share the information with a large number of people.

The television is an important means of mass communication. They provide us with a lot of information on different topics.

We get information on almost everything on the Internet. It is a **storehouse** of information. It helps us to communicate with anyone around the world easily.

The radio is also important for mass communication. We can listen to various news and announcements on the radio.

Quick Question

What is a PIN code? Find out.

Teacher's Pro Tip

Conduct a role-play in the class with only gestures and expressions. The students can be involved in various aspects—acting, script writing and costumes.

Words I Learnt

- **facial**- of the face
- **gestures**- hand or head movements to express an idea or feeling
- **nowadays**- these days
- **storehouse**- containing a lot of information

I Learn, I Answer

A. Fill in the blanks.

1. Sharing information by talking or writing to people is called _____.
2. In the earlier times, people used _____ to give a message of any danger.

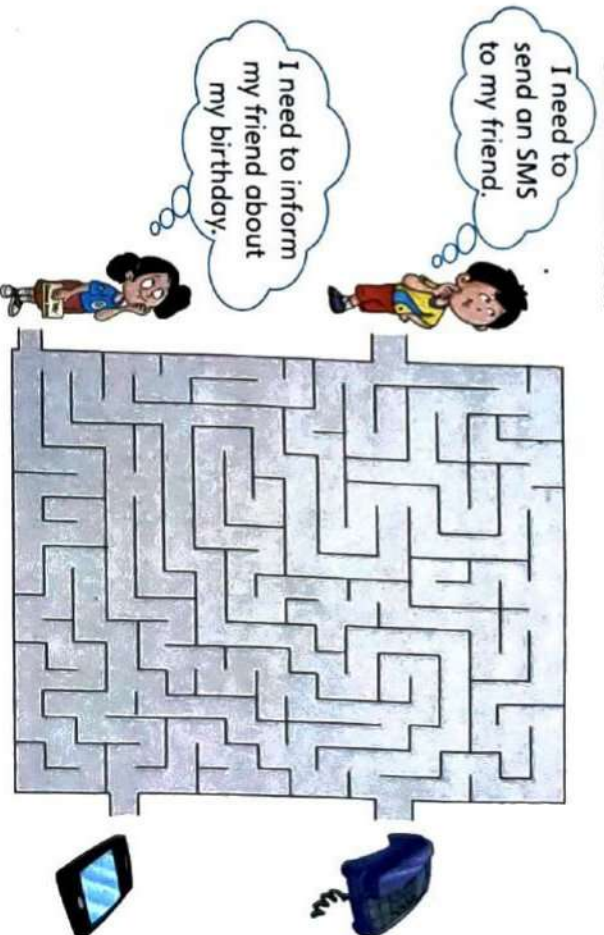

B. Write T for true and F for false.

1. Smoke signals are used by people very often these days. _____
2. Radio is a means of mass communication. _____

C. Answer in one sentence.

1. What is the Internet?
2. What is non-verbal communication?

D. Help these children reach the correct means of communication.

E. Picture Study

Which of these objects do we use nowadays to communicate with people? Circle them.

Cross-Connect

Art

Imagine you go to a shop to buy a pair of footwear. How would you communicate what kind of footwear you want to buy? Do a role-play with your partner.

I Can Make a Difference

Critical thinking,
Problem-solving

Rekha goes to meet her aunt, uncle and cousin. Her cousin is rude and does not play with her. Rekha feels bad and does not say anything to anyone. What should Rekha do to feel better?

(Hint: We should always communicate our thoughts and feelings.)

Y9

Fitness Activities

Stand Like a Stork

1. Stand on one foot and hold position for 10 seconds.
2. Repeat 10 times with each leg.
3. You can take the support of a wall or chair, if needed.

Chasing Games

Play Chasing Games such as Tag Game, Chain Chain and Hide and Seek.

Fitness Pro Tip

Drink six to seven glasses of water every day.

Keep yourself neat and clean to stay fit and healthy.

Tick (✓) the activities you do with a red crayon.

take a bath every day

wash hands often

clip nails regularly

brush teeth
twice a day

comb hair
every day

wear clean clothes

Assessment-II

(Based on chapters 9 to 18)

A. Replace the underlined word in each sentence with the correct word.

1. Stems help in preparing food for the plant. _____
2. Horse is a carnivorous animal. _____
3. Moving air is called storm. _____
4. Venus has rings around it. _____

B. Write T for true and F for false.

1. The peacock is the national bird of India. _____
2. Oceans are the largest water bodies. _____
3. The Sun is at the centre of the solar system. _____
4. Saturn is the largest planet in the solar system. _____

C. Circle the odd one out.

1. Monday, Tuesday, Wednesday, June
2. North, South, West, East
3. Earth, Venus, Mars, Moon
4. December, November, October, Sunday

Test Paper-II

(Based on chapters 9 to 18)

A. Fill in the blanks.

10

1. Plants give out _____ while preparing food.
2. Horses live in _____.
3. Trees shed their leaves in the _____ season.
4. The big hand of the clock tells us the _____.
5. The _____ is the national animal of India.

B. Complete the given table.

10

1.	Thursday		Saturday	
2.	Venus		Mars	
			Saturn	

C. Name them.

10

1. The Sun rises in this direction. _____
2. This planet is nearest to the Sun. _____
3. It is the highest point of a mountain. _____
4. They are also called the food factory of a plant. _____
5. It means the sharing of information with a large number of people. _____
